EXPERIENCE

Codev — *Front-end Developer*

February 2022 - Present

- Develops new user-facing features
- Translate UI/UX design from Figma to a usable front-end web application
- Build design systems for reusable code blocks
- Collaborate with back-end developers and web designers to improve website usability

Codingchiefs — *Front-end Developer*

July 2021 - December 2021

- Develops new user-facing features
- Translate UI/UX design from Figma to a usable front-end web application
- Build design systems for reusable code blocks
- Collaborate with back-end developers and web designers to improve website usability

XDevs / TRR Technologies — *Software Engineer / Creative Technologist*

July 2018 - February 2021

- Develops new user-facing features
- Translate UI/UX design from Figma to a usable front-end web application
- Build design systems for reusable code blocks
- Collaborate with back-end developers and web designers to improve website usability
- Write functional requirement documents and guides

Xerkit — *Software Engineer*

August 2017 - July 2018

- Develops mobile app for IoT product
- Rapid prototyping in IoT products that sync up with a mobile app
- Stay up-to-date on emerging technologies

EDUCATION

University of Science and Technology of Southern Philippines — *B.S. Computer Engineering*

June 2011 - April 2017

C.M. Recto Ave., Lapasan, Cagayan de Oro City, Philippines, 9000

SKILLS

Work with UI/UX designers and engineers to build applications using modern front-end technologies.

Develop, test, and maintain scalable, reusable front-end code.

Identify and troubleshoot performance and scalability issues to ensure a smooth user experience.

Participate in code reviews and share knowledge with the team.

Excellent problem-solving skills and attention to detail.

Strong proficiency with frontend development technologies, including HTML, CSS, JavaScript, TypeScript, and React.

Writing clean and testable JavaScript/TypeScript.

Excellent problem-solving skills and attention to detail.

TOOLS

Javascript/Typescript

Framework/Metaframework: VueJS, NuxtJS, ReactJS, NextJS

State management: Vuex, Pinia, Redux

Styling/Framework: SCSS modules, Tailwind, MUI

Testing: Jest

Bundler: Webpack
